

Practical Assignment 5

By Hayley Dodkins, Jessica Bloem, Mihail Dicoski, Thando Dlamini,
Tinotenda Gwanyanya, Precious Nhlapho and Kumbi Shonhiwa

Task 1: Research

History of Wine

Wine is made from fermented grape juice, however it is an alcoholic beverage that has been drunk and made in different parts of the world. The history of wine dates back to over 5000 years ago.

Its discovery is said to have been uncovered when grapes had been left for too long in amphorae or earthenware jugs. They would soon become tainted with wild yeast, eventually leading to their fermentation, brave individuals would then proceed to drink the tainted grapes leading to the creation of wine.

History of Wine

What is the 100-point scale?

The 100-point scale was popularized by Wine Spectator magazine and by Robert Parker in his Wine Advocate newsletter.

Getting a rating from this scale, has been said to either make or break a wine brand, due to the prestige that the scale holds. Most wines that are evaluated using this scale normally fall into the 85-100 points.

The scale is based on the American high-school marking system, so the scale will start at 50 and not 0, leading to additional criticism. There are other point scales such as the 5-point scale, the 20-point scale however the 100-point scale is the most popular.

Types of Wine

Red Wine

Made from black grapes fermented with the grape skin, seed and stems (Jordan, 2019). The red colour comes from the grape skin.

Red wine is high in tannins which is why it has a bitter and dry taste (Gillen, 2022).

Red wine is best had at or slightly below room temperature since if the wine is chilled the tannins in the wine can become bitter.

The darker or newer the wine the more tannins it contains so an older wine will taste less dry and bitter (Gillen, 2022).

Red wine is best paired with wholesome foods (Gillen, 2022) such as pizza, red meat and pasta.

Types of Wine

White Wine

Made from both white and black grapes that are fermented without the grape skins (Jordan, 2019) so only the clear grape juice is used.

White wine is low in tannins (Gillen, 2022) making it more acidic with a tart flavor. White wine is best has chilled to bring out its flavours.

White wine pairs best with light dishes (Gillen, 2022) such as chicken, seafood and salads.

Rose Wines

Made from black grapes that are fermented with the skins for a brief period before removing the skins to create its pink colour (Jordan, 2019). Rose is low in tannins but some rose can be dry (Jordan, 2019).

It has a light and sweet flavour. Rose is best paired with light dishes and appetizers such as seafood, fruit, cheese and poultry.

Types of Wine

Sparkling Wines

Sparkling wines are carbonated wines made from black and white grapes (Gillen, 2022) where the carbon dioxide creating the carbonated wine is naturally occurring due to the fermentation (Jordan, 2019). Best paired with light foods such as cheeses, seafood and fruit.

Desert Wines

Dessert wines are sweet wines that are had after a meal sometimes as a dessert. Best paired with a dessert such as a cheesecake, pudding or crème brulee.

Types of Wine

Fortified Wine

Fortified wines contain spirits which are added during the fermentation process (Jordan, 2019). These wines are sweetened by alcohol and can be used as dessert wines. Due to the added spirit these wines tend to have a higher alcohol percentage and are paired well with baked goods such as tarts, cheese and other desserts.

Orange Wine

Made with white grapes fermented with the skin on giving it an orange colour . This means that orange wine does have tannins but still maintains the crisp taste of a white wine. Served at a slightly warmer temperature than a white wine and pairs well with hearty dishes such as pork or beef (Gillen, 2022).

What Is a Wine Varietal?

A wine varietal is a wine made with one variety of grapes, such as pinot noir, chardonnay, and cabernet sauvignon (Wines, 2023).

Different types of wine such as red wine, white wine, sparkling wine, and dessert wine are not varietals, but varietals exist within these categories.

In some wine-producing regions, a varietal has the same name as the grape it's made from such as Syrah which is a varietal made from Syrah grapes. This is a common naming convention in North America, Australia, and South America.

In more traditional wine regions, such as France and Italy, varietals' names come from where winemakers produce the drink instead of the grape variety. A Burgundy wine, made in the French wine region, contains Pinot Noir grapes.

Wine Varietals vs. Wine Blends

Wines that are made from two or more types of grapes that don't meet the varietal threshold are blends.

For example, a Bordeaux blend usually contains cabernet sauvignon, merlot, Malbec, and Petit Verdot.

There are an estimated 10,000 varieties of wine grapes grown around the world (Vineyard, 2023).

Red Wine Varietals

1. Cabernet sauvignon:

This varietal is high in tannins and has peppery and fruity notes (Puckette, n.a).

2. Malbec:

This varietal has hints of blackberry, plum, cloves, and pepper. Malbec grapes originated in France but are the predominant variety in Argentina (Critic, 2023).

3. Merlot:

Merlot wines have deep fruity flavors such as blackberry, plum, black cherry, and black currant. In warm climates like Chile, merlots tend to have a higher alcohol content (Critic, 2023).

4. Pinot noir:

This red wine has notes of red fruit, such as strawberry, cherry, and cranberry. Pinot noir is a versatile grape variety that winemakers also used to make white wine, rosé wine, and sparkling wine (Puckette, n.a).

5. Sangiovese:

Sangiovese varietals have hints of raspberry and licorice. Producers commonly blend the black Sangiovese grape with other varietals in Chianti, an Italian Tuscan wine blend (Critic, 2023).

6. Syrah:

This red grape goes by "Syrah" in the French Rhône Valley and "Shiraz" in Australia. Due to regional differences, syrahs from Italy and France are more acidic and have earthy tones with herbaceous aromas. New World syrahs tend to be fruit-forward with hints of spice (Puckette, n.a).

7. Zinfandel:

Fruity and spicy with strawberry, raspberry, cherry, and blackberry notes, zinfandel is both a red wine and a sweet rosé. Some winemakers also produce white zinfandel (Puckette, n.a).

White Wine Varietals

1. Chardonnay:

This full-bodied varietal has hints of pear, apple, tropical fruit, and vanilla. Wine producers make chardonnay in many parts of the world, though its roots trace to Burgundy (Puckette, n.a).

2. Chenin blanc:

This grape variety originated in the Loire Valley in France and has citrus and floral notes. Producers also make Chenin blanc in South Africa and California (Zhang, 2023).

3. Muscat:

In Italian, the Muscat family of grapes goes by “Moscato.” Moscato is a fruity, sweet wine with notes of peach, nectarine, and orange. The Piedmont region in Italy produces Moscato wines (Zhang, 2023).

4. Pinot grigio:

Fresh and zesty, this varietal is also known as pinot gris. It originated in Burgundy and has pear, peach, and apricot notes (Puckette, n.a).

5. Riesling:

Highly acidic with fruit flavors such as nectarine, apple, and pear, this white grape originated in the Rhine region of Germany (Puckette, n.a).

6. Sauvignon blanc:

Fresh and crisp, with high levels of acidity, sauvignon blanc has notes of grapefruit, white peach, and passion fruit. In California, it's sometimes called fumé blanc because of oak aging in the winemaking process (Puckette, n.a).

7. Viognier:

This aromatic, full-bodied varietal has hints of rose petal, tangerine, and citrus. While Viognier is grown in North America and New Zealand, it originated in the Rhone Valley and is the only grape used in Condrieu wine (Zhang, 2023).

Wine Regions

South Africa is known to produce some of the most unique wines due to its soil resulting in bold red and white wines.

Most South African wines come from the Western Cape with the exception of Lower Orange River and Douglas in the Northern Cape (Folly, n.d).

The Western Cape has a hot climate making it a great location to produce bold red wines such as Syrah, Pinotage, and Cabernet.

The cooler climate found in the Cape South Coast is great for the production of Chardonnay and Sémillon.

Wine regions in the Western Cape include Stellenbosch, Paarl, and Swartland (Folly, n.d).

Information for A Wine Tourist

What is wine tourism?

Also known as enotourism and vinitourism, it is a branch of food tourism which is primarily focused on wine and its consumption.

It is all about getting to know about different types of wine around the world, learning about it as you are traveling.

There are a multitude of activities that a wine tourist would partake in, one of them being vineyard and winery tours, which are meant to show tourists the how wine is produced and to taste the wine.

Information for A Wine Tourist

The Benefits of wine tourism

Wine tourism has brought a massive positive impact on the wine industry, becoming a source of alternative income, helping winemakers and wineries to become more profitable.

It has also become a place to allow people who share their passion with people who will appreciate it.

It has become a place for people to experience new and different wines and provided a platform for people to visit different wineries from their regulars.

It has also provide the opportunity for people to learn more about wine, winemaking and wineries.

Task 6: Development

Data Validation

Login Validation

```
<?php
session_start();
require_once 'config.php';
if ($_SERVER['REQUEST_METHOD'] == 'POST') {
    $email = sanitize_input($_POST['email']);
    $password = sanitize_input($_POST['password']);

    $salt = '1a3b5c7d9e2f4g6';
    $hashed_password = hash("sha256", $password . $salt);

    $connection = new Connect();
    $conn = $connection->conn;

    $stmt = $conn->prepare("SELECT * FROM User WHERE Email=? AND 'Password'=?");
    $stmt->bind_param("ss", $email, $hashed_password);
    $stmt->execute();

    $result = $stmt->get_result();

    if ($result->num_rows === 1) {
        $row = $result->fetch_assoc();
        $_SESSION['user_id'] = $email;
        $_SESSION['logged_in'] = true;
        header("Location: index.php");
        exit();
    } else {
        header("Location: login.php?error=incorrect username or password");
        exit();
    }
} else {
    header("Location: login.php");
    exit();
}

function sanitize_input($data) {
    $data = trim($data);
    $data = stripslashes($data);
    $data = htmlspecialchars($data);
    return $data;
}
?>
```

```
</form>
<script>
    function validateForm() {
        var email = document.getElementById("inputemail").value;
        var emailRegex = /^[a-zA-Z0-9_+@-]+\.[a-zA-Z0-9_+@-]{2,4}$/g;

        if (!emailRegex.test(email)) {
            alert("Invalid email address.");
            return false;
        }
        return true;
    }
</script>
</body>
```
